Loaded for safety, no competitor offers these following features:

- All stainless steel and aluminum fasteners
- Magnets that are 70% to 200% stronger than any competitor ( depending upon the comparison ). We have more neodymium ( rare earth magnetic material ) by weight, in our magnets, than any competitor.
- Real rubber boots ( 100% EPDM rubber that stays soft in the cold )
- Built in side strap mounts ( you should always have the option to strap down your signs )
- Guaranteed graphic adhesion ( no peeling, no extra work, and no worries )
- On signs equipped with lights, high quality electrical connectors ( these connectors all have proper strain reliefs and will out last the cords of our competitors ). This will save you money.
- Airfin molded from impact modified acrylic, long UV resistance
